Advanced methods of open source intelligence analysis (OSINT2)

On December 19-21, 2023, CBA officers improved their analytical skills during a three-day specialized training entitled: "Advanced White Intelligence Methods (OSINT 2)." It was a continuation of the October training, but this time it focused on more advanced methods of obtaining information from open sources. Thanks to the workshop format, participants had the opportunity to immediately test the acquired knowledge in practice.

The training was carried out as part of the project "Strengthening the competences of law enforcement agencies and the justice system in the area of criminal and strategic analyses, supporting the process of recognizing, combating and preventing corruption and economic crime." The project is financed by the Norwegian Financial Mechanism 2014-2021 in program area PA20 "International police cooperation and combating crime"

in the "Internal Affairs" Program. The total value of the project is EUR 545,292.00, i.e. PLN 2,345,411.00.
